Air Waybill Number ______________________________

Lithium batteries that have been recalled by the manufacturer for safety reasons must not be shipped by air. Packages must be handled with care. If damaged, a flammable hazard exists and special procedures must be followed, to include inspection and repacking if necessary.

One or two devices (e.g. cell phones or laptops) with batteries contained in equipment that have less than the watt hour or grams allowed do not require this document or the lithium battery handling label and may be tendered as non-dangerous goods. (See IATA Packing Instruction 967 or 970.)

This package contains lithium cells or batteries in the following configuration (check all applicable boxes):

<table>
<thead>
<tr>
<th>Lithium ion – Maximum of</th>
<th>Lithium metal – Maximum of</th>
</tr>
</thead>
<tbody>
<tr>
<td>- 20 Watt – hours (Wh) per cell; and</td>
<td>- 1 gram (g) of lithium metal per cell; and</td>
</tr>
<tr>
<td>- 100 Watt – hours (Wh) per battery</td>
<td>- 2 grams (g) of lithium per battery</td>
</tr>
</tbody>
</table>

☐ Cells or batteries only (UN 3480 PI 965, Section II) in a package, without equipment, must be shipped on cargo aircraft only and bear the CAO label in addition to the lithium battery handling label. Only 1 package is permitted per shipment. Batteries must have a state of charge (SoC) 30% or less of rated capacity. Package Limit: ≤ 2.7 Wh = 2.5 kg; or > 2.7 Wh but ≤ 20 Wh = 8 cells; or > 2.7 Wh but ≤ 100 Wh = 2 batteries

☐ Packed with equipment (UN 3481 PI 966, Section II) – Cells or batteries contained in a package may or may not be installed in the equipment. The maximum number of batteries allowed is the minimum number to power the device plus 2 spares. Maximum Net Weight of batteries only: 5 kg (11lbs)

☐ Contained in equipment (UN 3481 PI 967, Section II) – Cells or batteries installed in equipment to power the device. Maximum Net Weight of batteries only: 5 kg (11lbs)

☐ Cells or batteries only (UN 3090 PI 968, Section II) in a package, without equipment, must be shipped on cargo aircraft only and bear the CAO label in addition to the lithium battery handling label. Only 1 package is permitted per shipment. Package Limit: ≤ 0.3 g = 2.5 kg; or > 0.3 g but ≤ 1 g = 8 cells; or > 0.3 g but ≤ 2 g = 2 batteries

☐ Packed with equipment (UN 3091 PI 969, Section II) – Cells or batteries contained in a package may or may not be installed in the equipment. The maximum number of batteries allowed is the minimum number to power the device plus 2 spares. Maximum Net Weight of lithium content: 5 kg (11lbs)

☐ Contained in equipment (UN 3091 PI 970, Section II) – Cells or batteries installed in equipment to power the device. Maximum Net Weight of lithium content: 5 kg (11lbs)

Only select cities have freighter service. Contact 1-800-225-2752 for more information.

Marking/Labeling

The package must bear a lithium battery handling label marked by the shipper as indicated.

*Place for UN Number(s) **Place for Telephone

The telephone number on the lithium battery handling label must be the same as the contact number provided below.

Signature: ______________________________________ Phone #: __________________ Date: _______________

Retain one copy of this form on file with the station copy of the air waybill. One copy must accompany the shipment attached to the package. Note: This information may be presented by the shipper on a similar document.
